ABOUT HMP

Hindle Mason Projects continues to build on its more than 30-year long legacy as the foremost provider of quality turnkey structural rehabilitation and corrosive/erosive protection solutions.

These reliable, cost-effective and time efficient services are being harnessed by our international clients operating across the mining, industrial, agricultural, property and public sectors to significantly prolong the useable life of their structural assets.

Our track record successfully completing many structural rehabilitation and corrosive/erosive protection projects of various sizes and complexities speaks for itself.

This ability is based on a deep understanding of the various causes of structural failures. It informs the state-of-the-art methods that we deploy to arrest deterioration and repair, maintain, or rebuild existing structures.

Moreover, Hindle Mason Projects ensures that we are always at the cutting-edge of best practice in structural rehabilitation and corrosive/erosive protection practices. This is by constantly researching and testing new methods and materials that have the potential to further optimise our processes and provide even more value. Hindle Mason Projects' personnel also regularly attend demonstrations and instruction in structural rehabilitation and corrosive/erosive protection technologies from our many supply chain partners. Our long association with recognised leaders in their field further hones our strategic competitive edge.

Hindle Mason Projects' skilled and experienced construction managers and site support staff also constantly develop their proficiencies by attending targeted training. Among others, this includes in the fields of management; mechanical operation and equipment maintenance; scaffolding erection; and support safety disciplines.

These extensive skills and experience are implemented according to the ISO 9001:2008 Construction Quality Assurance Programme and strict Safety, Health and Environment policy as is demonstrated by our "Five Shield" Dekra ratings.

We look forward to assisting you with your unique structural rehabilitation and corrosive/erosive protection requirements.

SERVICES

Continuous safety and cautionary procedures adhered to throughout operations

Concrete Rehabilitation & Construction

- Scoping Problem Areas
- Cost Estimates for Concrete Rehabilitation
- Surface Preparation
- Concrete Repairs
- Core Drilling
- Reinstating Concrete
- Cover
- Civil Works
- Sand Blasting & Hydro Blasting
- Anchoring
- Demolishing
- Reinforced Concrete
- Scaffold Erection & Maintenance
- Project Management
- General Maintenance
- Long Term Maintenance Contracts
- Crack Injection & Crack Stitching
- Gunnite Spray Systems

SERVICES

Corrosion Protection, Protective Coatings & Industrial Linings

- Cementitious Coatings
- Waterproofing Systems
- Acid Resistant Lining Systems
- Epoxy & Polyurethane Flooring Systems
- Epoxy & Polyurethane Corrosion Protection Coatings
- Polyurea Systems
- Joint Sealing
- Abrasive Wear Linings

SERVICES

Structural Strengthening

- Carbon Fibre Wrapping Strengthening
- Carbon Fibre Plate Strengthening
- Rebar Replacement
- Structural Jacking/Propping

SERVICES

Environmental Rehabilitation

- Gabion Construcion
- Site Restoration
- Earth Moving
- Erosion Prevention
- Toxic Waste Removal & Encapsulation

Site Investigations & Diagnostic Testing

- Core Drilling Samples
- Compressive Strength Testing
- Soil Sampling
- Carbonation/Chloride Testing
- Environmental Studies
- Site inspection & Reports
- Rebar Scanning
- Pull Off Testing
- DFT Testing
